EXPLORATION GEOPHYSICS, REMOTE SENSING AND ENVIRONMENT

Journal "Exploration Geophysics, Remote Sensing and Environment" (EGRSE) publishes original contributions dealing with:

- application of geophysical methods in geology, engineering geology, hydrogeology,
 - geofactors of environment and geothermal energy,
 - remote sensing and its application in geology, geodesy, GIS and ecology,
 - tectonophysics, physics of the interior of the Earth, seismology, seismotectonics and seismic hazard

COVER: Seismologicky aktivní oblast v okolí města Aswan (Egypt), zachycená mapovým prohlížečem Google Earth (k článku Haggag H. M. - „Seismicity...“). Seismological active area in surrounding of Aswan town (Egypt), recorded by Google Earth map server (Paper Haggag H. M. - „Seismicity...“)

Východní část stejné oblasti zachycující předpokládanou SZ – JV transkurentní tektonickou zónu.
The Eastern part of the same area recording supposed transcurrent tectonic zone.
