

EAGE - European Association of Geoscientists and Engineers

EAGE is a professional association for geoscientists and engineers. Founded in 1951, it is an organization with a worldwide membership providing a global network of commercial and academic professionals. The association is truly multi-disciplinary and international in form and pursuits. All members of EAGE are professionally involved in (or studying) geophysics, petroleum exploration, geology, reservoir engineering, mining and civil engineering. The EAGE operates two divisions: the Oil & Gas Geoscience Division and the Near Surface Geoscience Division.

EAGE organizes the following activities for its members: Events (conferences, exhibitions, and workshops), Publications (journals, books), Educational Programmes (short courses, lectures) and Student Programmes Recruitment.

EAGE's Head Office is located in the Netherlands with Regional Offices in Moscow, Dubai and Kuala Lumpur.

Associated Societies

In the past years EAGE introduced the Associated Society Membership. Through this membership local and national geoscientific societies are given the opportunity to use the knowledge and network of an international, professional society like EAGE.

Current President (June 2010 - May 2011): Davide Calcagni

Head office Visiting address:

EAGE, De Molen 42, 3994 DB HOUTEN, The Netherlands
